

Clarification No 1

Related to Call for Proposals GSA/GRANT/03/2015

“Development of E-GNSS engine for liability- and payment- critical multi-applications in road transportation”

1. Question:

On page 12 of the Call, it is mentioned that a "participating third country to the activities of the European GNSS Programmes (Article 30 of the GNSS Regulation)" can be an eligible applicant. I would like to know the up-to-date list of such third countries, in order to ease the setup of a suitable and competitive consortium.

Answer:

On page 12 you can find in the footnotes that *“At the time of publication of this call, Switzerland and Norway are expected to participate in the GNSS programmes. Confirmation of their participation is, however, subject to the satisfactory conclusion of their respective procedures adopting the cooperation agreements.”*
