

EUSPA's first open-air exhibition is now open to the public! Come and have a look!

EUSPA/PR/21/03 Prague, 4 November 2021

From November 4 to 6, we are bringing the power of the EU Space Programme down to Earth! A colourful experience invites you to discover the latest applications and services enabled by Galileo, EGNOS, Copernicus, and GOVSATCOM.

Under a new name and with a broadened scope of activities, EUSPA decided to move its signature event, "Open Days" outside to comply with the current hygiene rules. "[EUSPA Open Space](#)" is a walkthrough, open-air exhibition that will introduce visitors to the newly established EU Space Programme as well the agency's new mission.

With just a month away from the launch of the newest Galileo satellites from the European Spaceport, EUSPA Open Space will offer you the possibility to brush up on space knowledge! Wander around the exhibition, learn more about the upcoming services of Galileo and EGNOS before immersing yourself in a colourful Earth Observation collection with Copernicus images from around Europe.

With Europe set to become climate-neutral by 2050, space data and services play a crucial role in the EU Green Deal. From helping curb CO2 emissions to fighting illegal logging, Galileo, EGNOS and Copernicus contribute to the fight against climate change. EUSPA Open Space also highlights the link between the EU Space Programme, climate action, and sustainability.

For those interested in the agency's activities, career, and funding opportunities EUSPA Staff will be available in the expo area.

On November 5, from 10:30 to 11:00 and November 6, from 11:00 to 11:30, Executive Director, Rodrigo da Costa, will be answering visitors' questions.

How to reach us?

The exhibition will be open to the public from 4 to 6 November 2021 from 09:00 to 22:00 at Janovského 438/2, 170 00 Praha 7-Holešovice.

About the European Union Agency for the Space Programme (EUSPA)

The European Union Agency for the Space Programme (EUSPA) provides safe and secure European satellite navigation services, promotes the commercialization of Galileo, EGNOS, and Copernicus data and services and coordinates the EU's forthcoming governmental satellite communications programme GOVSATCOM. EUSPA is responsible for the security accreditation of all the EU Space Programme components. By fostering the development of an innovative and competitive space sector and engaging with the entire EU Space community, EUSPA contributes to the European Green Deal and digital transition, the safety and security of the Union and its citizens, while reinforcing its autonomy and resilience.
