

Clarification Note No 3

EUSPA internal reference: 321168

Grant procedure: EUSPA/GRANT/02/25

"Robust and professional receiver leveraging on Galileo differentiators"

Question #8: We would like to formally request a two-week extension for the submission deadline.

Answer #8: Considering:

- that the grant documentation was published on 24/10/2025 with an initial submission deadline set for 30/01/2026, resulting in a grant preparation of 3 months;
- that no substantial changes to the documentation have been introduced as of the launch of the grant procedure;
- that on 09/01/2026 the Contracting Authority published Corrigendum no 1 granting a 2-week extension of the submission deadline (i.e. until 27/02/2026)
- the Contracting Authority's needs;

it has been decided not to extend further the deadline for submitting applications. Therefore, the time limit for submission of applications remains 27/02/2026. You may consult Corrigendum no 1 in this respect.
