

Clarification Note #4

EUSPA internal reference: 323378

Procurement procedure: EUSPA/OP/02/25

Title: EGNSS Transversal Service Contractor (“ETSC”)

Question #5:

While the system requirements and interfaces for the EDS (EGNSS Demonstrator System) are available, the current documentation remains limited to a high-level specification and architecture, which is not sufficient to accurately assess the scope, complexity, and associated costs of the operation and maintenance activities. In order to provide a reliable estimation of the required effort, resources, and risks, a more detailed understanding of the system is necessary. Therefore, we kindly request additional information, including detailed system design and implementation documentation, deployment architecture, operational concept (CONOPS), maintenance procedures, system configurations, underlying infrastructure, and any available operational history or performance data. This additional information will enable a more robust and realistic cost evaluation.

Answer #5:

Please refer to the Corrigendum No. 3. The relevant documentation will be made available to potential tenderers having successfully completed the NDU process under Section 2.2 of the Tender Specifications.

Question #6:

We have seen that the deadline to submit the Non-Disclosure Undertaking (“NDU”) has passed. May we still submit the NDU?

Answer #6:

*Please refer to Section 2.1 of the Tender Specifications, which states that the deadline “[...] is **advisory**. It is up to the tenderer to decide when to submit the NDU, so that they have enough time to prepare their tender.”*
