Clarification Note #9

EUSPA internal reference: 325391

Procurement procedure: EUSPA/OP/02/25

Title: EGNSS Transversal Service Contractor ("ETSC")

Question #17:

Proposal economic conditions cannot be found within the Tender Specifications, and both Annex I.F.1 and I.F.2 allow the selection of the year. Can you confirm that 2025 economic conditions are expected? Given that no price indexation is foreseen throughout project execution as stated in the draft contract, will the proposal economic conditions be update to contract signature date (year)?

Answer #17:

The applicable Economic Conditions are the ones applicable at the moment of submission of the financial proposal, hence 2026, considering the current submission deadline. The prices included in the financial proposal are firm and fixed and will not be subject to any revision or indexation, neither at the moment of the contract signature, nor further on in contract execution.

Question #18:

Option 3 requests the Contractor to halt all the activities during the E-GSC major evolutions, in particular the E-GNSS Transversal Infrastructure Service Operations, directly linked to Task 2.1 of the SoW. Given that the ETSC Contractor shall carry out its obligations under EUSPA-CD-24-21 during Option 3 (and Option 4) and in order to avoid financial overlaps between the 2 contracts, can EUSPA confirm that their only expectation for Option 3 is to stop activities linked to Task 2.1 while continuing nominally Tasks 2.2, Task 3 and Task 4?

In case the activities to be stopped are broader than Task 2.1, could EUSPA provide further details about the expected activities to be stopped during the execution of Option 3?

Answer #18:

As described in requirement ETSC-REQ-386, during the activation of Option 3 the Contractor shall halt all the activities, i.e., all the tasks described in the Statement of Work. These activities shall be performed by the Contractor as a mandatory subcontractor within the EUSPA-CD-24-21 Contract.
