

Clarification Note No 2

EUSPA internal reference: WF 326551

Call for Expression of Interest for High Accuracy Service (HAS) Full Service Testing

Question no. 4:

For the planned testing activities, we are considering using a receiver, which supports Galileo HAS via the E6-B signal and provides access to raw GNSS measurements.

Could you please confirm whether a research institution using a commercially available HAS-capable receiver may participate in the Call and whether this receiver could be considered suitable for the planned testing activities in accordance with the technical requirements specified in the Call?

Answer no. 4:

Please note that research institutions can participate in this Call provided that they meet the eligibility criteria, exclusion criteria and selection criteria respectively indicated in Section 4.1, Section 4.2 and Section 4.3 of the Call for expression of interest.

With regards to the selection criteria, the assessment of expressions of interest will be based on the cumulative selection criteria defined in Section 4.3 of the Call for expression of interest, to be evidenced in line with the requirements indicated therein.

For the sake of clarity, please note that whenever “HAS” is mentioned in the Call (including in Section 4.3), it shall be read as “HAS FULL SERVICE”, which incorporates the changes described in Section 3 of the Call.
