

Czechia: Engineering services

Space Traffic Coordination Platform

Prior information notice or a periodic indicative notice used only for information

1 Buyer

1.1 Buyer

Official name: European Union Agency for the Space Programme

Legal type of the buyer: EU institution, body or agency

Activity of the contracting authority: General public services

2 Procedure

2.1 Procedure

Title: Space Traffic Coordination Platform

Description: Disclaimer: the description of the nature and scope of the services and supplies of the Space Traffic Coordination Platform procurement is only indicative, aimed at outlining the concept in broad terms and it may need substantial adjustments. Therefore it shall not be considered final nor binding. The EU Platform for Space Traffic Coordination aims to address the exponential increase in active satellites and the associated risks of orbital collisions, including those posed by large constellations. The initiative seeks to structure, secure and expand coordination between satellite operators, public entities and commercial SSA providers, building on existing services developed under EU Space Surveillance and Tracking (EU SST). It is intended to extend coordination beyond current EU SST members by enabling the collection and processing of key information, such as contact details and manoeuvre data from non-registered or international actors. The proposed platform should facilitate the secure, real-time exchange of operational data and ensure interoperability between the different actors involved in space traffic activities. The action should include the implementation of a sandbox to test and assess the "rules of the road", providing a controlled environment to evaluate their practical application and support validation prior to broader implementation. In addition, the initiative will include engagement and awareness-raising activities aimed at identifying the needs and expectations of EU Member States, satellite operators and SSA providers (public and private).

Internal identifier: EUSPA/PRG/2026/OP/0007-PIN

2.1.1 Purpose

Main nature of the contract: Services

Main classification (cpv): 71300000 Engineering services

2.1.2 Place of performance

Anywhere

Additional information: Please consult the procurement documents.

2.1.3 Value

Estimated value excluding VAT: 2 000 000 Euro

2.1.4 General information

Additional information: This prior information notice announces the intention of the contracting authority to publish a future call for tenders. No other information or documents are available at this stage. Interested economic operators are invited to subscribe at the link <https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/tender-details/711c7752-e961-4451-9b2f-b3aae93791cd-PIN> in order to get notified when the contract notice and all the procurement documents, including the tender specifications, are published.

Legal basis:

Regulation (EU, Euratom) 2024/2509
