Main site or place of performance:

The place of performance of the Contract shall be primarily at the contractor's premises with meetings and tool installation at EUSPA/GSMC sites in France and Spain, following prior approval by EUSPA.

II.2.4) **Description of the procurement:**

The scope of this tender procedure is aimed at designing, developing, deploying, installing, testing and maintaining 2 (two) PRS SIS Monitoring (PRIMO) tools.

Such a tool, hardware and software, will be able to monitor PRS Signal-in-Space (navigation and security message) that will be used to support PRS operations at GSMC main and backup sites, with the following use cases:

- PRS continuity and integrity monitoring,
- verification of the PRS security message,
- radio frequency (RF) monitoring,
- support to PRS operators and MS/CPA (tentative at this stage, will be confirmed in Phase II).

The PRIMO tool is completely independent from the Galileo System and it will support PRS operators inside the operations room as part of the Galileo operated baseline. As such, it shall be subject to an accreditation process by the Security Accreditation Board (SAB) for the security approval of the tool in light of Decision 2013/488/EU. Detailed requirements will be provided in Phase II.

The development of PRS technology, including PRS modules, requires attention in the following domains:

- security accreditation,
- PRS information management,
- operational constraints and requirements, allowing the use of the product in line with user expectations and agreed use cases,
- functional constraints such as a user-friendly interface allowing intuitive operations.

The contract shall ultimately lead to the development of the PRIMO tool compliant with the Galileo FOC (full operational capability) specification. All relevant interface control documents (ICDs) will be provided in Phase II.
